### ***Dwarf Planets Astrology Publications and the “10<sup>th</sup> Planet” Jubilee***

The former “10<sup>th</sup> planet” 2003 UB313, now ***largest dwarf planet Eris*** celebrates its first birthday with Dwarf Planets Astrology Publications. The first astrologic publication on ***Eris*** was published as early as August 1<sup>st</sup> 2005, only days after its official announcement. We immensely enriched the world of astrology and personal magick ever since. One of the results of our study was the special “X Zodiac” for Eris. Our publications teach the initiate how to scan as well as change any future event with dignity and competence.

### ***Astronomic Zodiac and Precessed Ascendant***

Why is Eris in setting in Cetus at the time the WTC was first hit? Which constellation really rises on your natal horizon? These questions are answered by the astronomic zodiac and precessed ascendant. The astrologer is finally able to attest for the true natal positions resulting in a better functioning of the horoscope with accurate predictions.
