

## Add to Chart Publications – 2006 Editorial – Zodiacal Reformation Retrospective

Copyright © 2006 by Klaudio Zic, all rights reserved. <http://www.lulu.com/astrology>

Greetings from Add to Chart Publications. Our early publications cover such basic astrologic material as the true zodiac and precessed ascendant. Ours may be the first reformation of scientific astrology in the past 13000 years. Previous civilizations observed the skies and so we do. This leaves the skies as they were at birth time. The client and astrologer can finally enjoy as well as work with true natal positions. A sample topic list of scientific astrology material could read as follows

- ★ **Zodiacal Reformation.** We have kept a check on the real zodiac during the legendary two summer months a couple of years ago using primitive equipment. What sprung out was the real zodiac as opposed to superstition. The astronomic zodiac and zodiacal reformation thus became the basis for our operation.
- ★ **26 IAU Zodiac.** The basic astronomic zodiac has only 24 IAU constellations. This zodiac has been conveniently nicked Neptunian Zodiac. The discovery of Pluto brings four new constellations to the astronomic zodiac but two are added here for all practical purpose. Separate publications deal with e.g. Pluto in Coma Berenices in the seventies of the past century or Pluto in Serpens Cauda which is the present position.
- ★ **X Zodiac.** The discovery of the 10<sup>th</sup> planet designated as 2003 UB313 has of course enlarged the zodiac. Not every new planetary discovery expands the zodiac but we have still to decide if Pluto and 2003 UB313 are planets by definition.
- ★ **True Ascendant.** The skies rotate due to precession. The set of ascendants thus changes according to epoch. Our epoch has only 16 ascendants. Astrologers know 5 out of 16 eastern ascendants. In other epochs diversity doubles with number.

- ★ The 16 eastern ascendants have been copiously documented in our publications and as available for free download. Our work in progress covers the 16 ascendants in synastry. A preview is available from the site. Hydra has been compared to the 16 ascendants and published as “16 versus Hydra”. Many astrologers that were thought as having Leo rising have in fact Hydra on their eastern ascendant. Special cases where three IAU constellations bracket the east point have been rounded up. In one case we have Canis Minor (Bush), Monoceros (Ver Neit Nubti) and Hydra (Liber AL) apparently sharing the same star. Sometimes it is hard of decide which of the three constellations is the ascendant. In our case we determined that Canis Minor stands for national minority, Monoceros for spiritual leadership and Hydra for Voodoo. The horoscope of Ver Neit Nubti was thus arranged as having three ascendants in one. To be on the precise side, Hydra was rising affording for a dark magical spraying of stardust but very close to positive Unicorn or Monoceros energy.
- ★ Now when the proper zodiac has been established as well as updated for new planetary discoveries and the house system adjusted to the true horizon, we can keep discovering new classes of objects and enjoy reliable scientific astrology.
- ★ That Neptune will show in the 6<sup>th</sup> house instead of 7<sup>th</sup>. Sometimes planets will shift from the 8<sup>th</sup> to 5<sup>th</sup> house. This is quite surprising but when we know that popular program tend to errors ranging from 40 to 270 degrees, nothing is comes as surprise.
- ★ The first download for the incipient astrologer are the Sun Ephemeris by NASA. No astrologer on this planet has been informed of his true natal Sun position on the past 2000 years. Now you can enjoy comparing positions. Sai Baba has been informed his natal Sun is in Libra on Nov 23<sup>rd</sup>. After Libra the Sun spends a week in Scorpius before heading towards large Ophiuchus and the negative Stargate in Sagittarius.
- ★ Pluto is presently moving from Serpens Cauda and through a part of Ophiuchus right into the negative Stargate in Sagittarius. We used the negative Stargate in our recent update of Adolf Hitler’s horoscope to predict a rise in planetary National Socialism.
- ★ The astrologer who discovers one’s own true natal Sun position can be rightfully called incipient. Our standard examples cover such horoscopes as that of Alice.
- ★ Alice was born in August 2004 with Moon in Cetus at the ascendant, Mercury in Sextans, Venus in Orion, Juno in Scutum and of course Pluto in Serpens Cauda.
- ★ Children will no longer be victims to their astrologically naive parents since every child and astrologer has the right to know one’s own true natal positions. This point has been dealt in detail in our M.A.R.S. publication as available for free download from our site. The search engine on lulu.com should help you with your search.

	Planetary Positions within the Astronomic Z	
22		
23		
24	Sun	Cancer
25	Moon	Cetus
26	Mercury	Sextans
27	Venus	Orion

- ★ Our present research is focused on distant solar system objects. We crossed the border of a 77000 years period for 2005 VX3 and are dealing with comets of much larger period. Objects like actual 2006 HW51 have a “modest” 11000 years period.
- ★ The Phoenix Cycle of the 10<sup>th</sup> Planet is connected to Leonardo da Vinci and C-14. The Federal Reserve System and business in general are put into relation with the Phoenix Cycle allowing for long-term financial predictions. President George Bush is seen as aligned with 2003 UB313 and Phoenix as meridian IAU constellation.
- ★ The reformation of the ascendant is followed by the even more demanding revision of the meridian constellation set. The meridian constellations require advanced astronomic knowledge. Phoenix has been chosen as ambassador of all meridian constellations. This constellation brings good luck in all and particularly business.
- ★ The compilation of all we ever wrote about each and every centaur must be a most complex project. Chariklo and Pholus have been covered in separate publications and that will probably be the format to adopt in the future by presenting every centaur with a separate series of publications. All our publications are updated for the most recent discoveries including this year’s centaurs. Since we are actually updating on daily basis all that we write today automatically includes the daily discoveries.
- ★ There are many surprises for those whose programs perhaps cover Chiron and no other centaur at all. What do we have to offer after 20 years of daily astrology? Surely much more than those who did not notice. Already the sole world of centaurs is an universe in itself able to expand as well as round up a natal horoscope analysis with excellent insight that is of course otherwise unavailable.
- ★ The focus of interest for a modern astrologer shifted from the centaur objects towards the large world of TNO or transneptunian objects. Our delineation covers all major TNO like Varuna, Ixion, Quaoar, Sedna, Orcus and the 10<sup>th</sup> planet 2003 UB313.
- ★ Two special planetary candidates have their separate delineation. 2003 EL61 and 2005 FY9 are among the three largest objects discovered after Pluto. Their delineation in the 12 houses for astrologers is entitled “New Planets”. The objects presently hover in Coma Berenices, an IAU constellation just above Virgo and Leo.
- ★ Women astrologers can enjoy Pluto and Feminism, a free download and treatise on Pluto in Coma Berenices especially designed for people born in the past seventies.
- ★ Besides researching the wild frontier of the solar system, we also keep an eye on the backyard. Our special interest is in our trojan moons that happen to meet in the summer months. A part of our “Three Moons meet” is scheduled for reissue.
- ★ The reader can further consult our periodical editor’s log as well as an aviary of preview, articles and catalogues on the site <http://www.lulu.com/astrology>

While we speak of Zodiacal Reformation Retrospective there is still a great number of people working with astrologic software calibrated for superstition but not nearly for exact natal data at all. This means all astrologic software can be discarded as useless toy.

Some idea of the true natal positions can be obtained from software such as popular Astrolog freeware. By typing a command such as > astrolog -XF from the command prompt one can check for Pluto in Serpens Cauda, Venus in Orion or Jupiter in Ophiuchus. Our publications cover the mentioned positions in detail with professional care. The difference is immense since we update the set of centaurs and TNO. Our scans show the real horizon and ascendant, something that no astrological program is able to.

For some 2500 years astrologers were forced to work with positions that were never really there, meaning frozen ascendants, impossible planetary positions and mock zodiacs which never existed at all in the real sky. This was all too well for superstition and devil but not well enough for scientific astrology.

We have dealt with personal devil and instant magick in our O5 publications. The Personal Cosmic Secretary follows O5 initiation. These methods deliver an optimized sequence of events, optimized for instant download from the astral domain. True Mind Distiller disintegrates false ego and personal devil unveiling a void mind or true mind. Snow Crash is the famous instant magick method granting wishes literally in minutes.

What good is a future predicted to the second that we could not change? It is with this question and principle in mind that we designed the Reality Rendering Tools, a set of simple mental tools able to change reality in record time according to your own plan as well as most secret wish. One minute of O5 is enough to discreate a bad transit ahead. One installs a positive effect before the bad transit has any chance of materialization.

Our ultimate purpose is complete emancipation from false mind complex. Astrology can help determining our course. It can as well inspire us towards supra-galactic experience. The Stargate is the standard outlet for the immortals as included in our every analysis.

Albeit we are able to predict your marriage to the minute years ahead before you meet your future bride, this is not our real purpose at all. Our real purpose is to guide as well as emancipate one from the clutches of the matrix of events. One can command events instead of just passively predict and adapt. We can transform from futile wish makers to stellar beings PER ASPERA AD ASTRA and possibly without much ASPERA at all.

False ego and the devil have held you in the clutches of the false zodiac and false ascendant. Now you can liberate your true self with Real Time Reality Rendering Tools.
